Preventive maintenance is always cheaper in the end. Remember the old saying a stitch in time saves nine. When you think about the average time it takes is 2 to 3 hours for a technician to come in and clean up just one of your machines. That is a costly experience when you pay by the hour. Northshore Micro would like to offer you a very cost effective Maintenance contract that will save you quite a lot of money.

Let me introduce you to our company and the services we provide. Northshore Micro is a computer service and repair company with over 25 years experience that is now offering a "Monthly Maintenance Contract". Once a month we will logon to your machine and perform the following:

- ✓ Spyware removal
- ✓ Malware removal
- ✓ Antivirus Updates
- ✓ Microsoft Updates
- ✓ File structure reorganization
- ✓ Removal of programs that slow your machine that are not needed to be running all the time

How much do you think a service like this is worth, to have the peace of mind knowing your machine is updated and running at its best? Would you be surprised if I told you that the Monthly Maintenance Contract is only \$24.99 a month per machine? If you think about the labor hours and potential downtime lost data can generate, you will realize that for as little as \$24.99 a month, you can take the steps to prevent that from happening.

For more information on prices, and additional services offered, please contact Northshore Micro at (985) 231-0272 or (504) 342-4858 or visit us on the web at www.northshoremicro.com.
